

THE SCHEDULE SIDE OF THE WHOLE SCHOOL YOU RUN

Full-Year Homeschool Planner with AI

A year-at-a-glance grid, a monthly planning page you can photocopy twelve times, a weekly rhythm planner, and a subject tracker so nothing falls through in June. AI drafts the theme ideas and the scope-and-sequence starter; the calendar itself is yours, filled in by hand.

What's in this pack

- **Year-at-a-glance grid** — twelve months, one page, themes and breaks at a glance.
- **The monthly planning page** — photocopy it for every month of your year.
- **Weekly rhythm planner** — the repeatable week, with a column for the rabbit hole you followed.
- **Subject tracker** — a scope-and-sequence checklist per subject, so June has no surprises.
- **The AI planning-prompt library** — year overview, monthly themes, and the re-plan-when-life-happens prompt.

Year-at-a-glance

Fill in a theme or focus per month and mark breaks — the whole year on one page, for the fridge or your planner's front cover.

Month	Theme / main focus	Breaks / co-op weeks	Field trip planned?
August			
September			
October			
November			
December			
January			
February			
March			
April			
May			
June			

Month	Theme / main focus	Breaks / co-op weeks	Field trip planned?
July			

The monthly planning page

Photocopy this page for each month — one template, used twelve times.

☐ Month: _____ Theme: _____

Goals for this month (2-3, keep it honest):

Books / resources we'll use:

One thing to look forward to this month:

Weekly rhythm planner

The repeatable week — copy it, or laminate one and use dry-erase.

	Mon	Tue	Wed	Thu	Fri
Morning basket					
Math					
Language arts					
Science / history					
The rabbit hole we followed					

Subject tracker

One row per subject, checked off as you cover it — no more wondering in June whether you ever got to fractions.

- ☐ Math

- ☐ Reading / language arts

- ☐ Writing

- ☐ Science

- ☐ History / social studies

- ☐ Other (art, PE, foreign language...)

The AI planning-prompt library

The year-overview prompt

"Suggest 12 monthly themes for a [GRADE-LEVEL] homeschool year covering [SUBJECTS/INTERESTS], loosely tied to the seasons where it makes sense. One line per month explaining the idea."

The monthly-theme starter

"Build a month of activity ideas around [THEME] for a [AGE] learner: one main project, three living-book style read-aloud suggestions, and two field-trip ideas near [REGION, no address]."

The re-plan-when-life-happens prompt

"We lost two weeks to [REASON, e.g. 'illness']. Given our year theme was [THEME] and we still need to cover [REMAINING TOPICS], suggest how to compress the rest of the term without cutting corners on [PRIORITY SUBJECT]."

The family data-safety habit

Every prompt above describes the learner, never the child — no names, ages tied to a name, or identifying details. And the grown-up always holds the keyboard: AI drafts ideas for you to adapt, never a conversation your child has alone.

Quarterly review checkpoints

Four short check-ins beat one overwhelming June review — pencil in a date for each.

- ☐ Quarter 1 review — did the theme match how the year actually started?

- ☐ Quarter 2 review — what's ahead of schedule, what's behind?

- ☐ Quarter 3 review — any subject due for the re-plan prompt?

- ☐ Quarter 4 review — what carries into next year's plan?

Make it a rhythm, not a rulebook

The grid on page one is a plan, not a promise — real weeks run short on sleep, long on illness, and off-script more often than not. The point of a year-at-a-glance page isn't to follow it exactly; it's to know, at a glance, how far off you actually are, and to have a system for closing that gap without guilt.

Need the prompts for the day-to-day, not just the year? Our Homeschool AI Planning Pack adds twenty subject-organized prompts and a unit study builder. In our TpT store.
