

FOR PRINCIPALS & SUPERINTENDENTS · 3-MINUTE READ

AI Foundations & Safety: The One Hard Rule

A 45–60 minute, self-facilitated session that gives your whole staff a shared, safe, realistic foundation for AI, run by your own coach or teacher-leader, no consultant required.

Why this matters now

Teacher AI use roughly doubled in a single year: from about 25% in 2023–24 to more than half of teachers in 2024–25 (RAND). Over half of teens already use AI for schoolwork (Pew Research Center). Meanwhile RAND's own headline finding is that **guidance lags adoption**: the tools arrived before the training did. Your staff are already deciding, individually and invisibly, what goes into public AI tools. This session replaces those individual guesses with one clear, shared standard.

What your staff will be able to do afterward

- State and apply the One Hard Rule: **no student PII in public AI tools, ever**
- De-identify any prompt in ~10 seconds (strip · generalize · describe the need)
- Use AI for a real task; every participant types during the session
- Verify AI output rather than trust it (they'll know why it fabricates)
- Apply the review rule: nothing AI-drafted reaches a student or family unread
- Operate under three written staff commitments, your interim stance until formal policy

Research base in brief

Adoption & guidance gap: RAND (2025, RR-A134-25 & RR-A4180-1) · Student use: Pew Research Center (2026) · Time savings: Gallup–Walton Family Foundation (2025): weekly AI users report ~5.9 hours/week back · AI fabrication evidence: Linardon et al., *JMIR Mental Health* (2025) · Privacy practice: U.S. Dept. of Education OET (2023) "humans in the loop"; Future of Privacy Forum vetting guidance (2024) · Session design (active learning + sustained follow-up): Darling-Hammond et al., *Learning Policy Institute* (2017). Full APA citations ship in the kit's References file.

Where it fits

Kit 1 of 8 in **Track A: AI Foundations**, a sequenced curriculum ending in the **AI-Ready Educator Certificate of Completion** for each staff member. It ships with a 30-day implementation plan (three 10-minute PLC follow-ups, no new meetings) and an exit ticket that doubles as PD documentation. Zero student data is involved anywhere: the session teaches privacy-first practice and the platform itself stores no student information.

What you get without a consultant: facilitator prep guide · 30-slide deck · word-for-word script · participant handouts · action sheet · 30-day plan · exit tickets · this page · verified references. Any confident coach or teacher-leader can run it cold.
