

KEEP THIS ONE; IT'S THE CULTURE'S BLUEPRINT

Building Your School's AI Culture

THE STANCE

Culture is what keeps working when the PD ends.
A tool becomes culture when nobody has to remember to use it.

The culture test

What would a new hire learn **by watching**, before anyone told them anything? If they'd see prompts shared, drafts reviewed, every assignment saying what AI use is allowed, and no student names near a chatbot: culture. If they'd have to be told: policy. Policies inform; cultures train.

The five norms (the jobs are fixed; the wording is yours)

Norm	The job it does	From
Privacy	No student information in public AI tools, ever	Kit 1
Review	Nothing AI-drafted reaches a student or family unread	Kits 1–6
Honesty	We say what we use; every assignment says what AI use is allowed	Kit 5
Sharing	Working prompts go in the library; nobody solves twice	Kits 2, 7
The protected list	The relational work stays human, by decision	Kit 7

Format rule: one page, five lines, plain words, signed by the faculty, posted where you'd post something you mean.

Our five norms, drafted (our building's words)

The sharing routine: win · fail · steal

Five minutes inside a meeting that already exists. One **win** (an AI-drafted thing that worked) · one **fail** (what it got wrong, shared without embarrassment: failure shared is quality control) · one **steal** (a template someone's taking from the library this week).

Our rhythm: _____

First round, date: _____

Owner of round one: _____

Onboarding: every future colleague, covered

- Kit 1 in the first month, run by any confident colleague, for one hire or five
- The norms page in the welcome folder
- A library tour from a colleague: where the templates live and how to add one

Skeptic partners (respected, recruited, named)

The colleagues whose doubts keep the culture honest get a real role: reviewers, drift-spotters, the people we ask "what's wrong with this?" first.

Ours: _____

Next semester's rhythm (minutes inside existing meetings)

- Sharing round: every PLC or every other one
- One 10-minute kit refresher a month (the 30-day plans are the material)
- Norms revisited in the first month back; new-hire Kit 1 as needed

Measuring without surveillance

Count **artifacts**, **never people**: library growth · exit tickets · sharing-round stories · every assignment says what AI use is allowed. Never audit an individual teacher's AI use; surveillance kills the openness that keeps the culture safe.

The certificate: completing Kits 1–8 earns the **AI-Ready Educator Certificate of Completion**: eight hours of hands-on professional learning with artifacts built every week. Check with your district or state whether it qualifies for local credit; your exit tickets are the documentation.
