

THREE ACTIONS · EACH UNDER 15 MINUTES · WITHIN TWO DAYS

Use it before you lose it

PD that isn't used within 48 hours mostly evaporates; that's why this sheet exists. Each action below uses something from today's session. Do all three, check the boxes, done.

ACTION 1 Do one real task with AI ~10 min

Pick one thing already on your to-do list (a family email, a quiz, a leveled reading passage). Say the prompt the unsafe way in your head, strip it with the 3 moves, and draft it with the AI tool from today's lab, safe version only. Then review it like the professional you are, add any names back in your own email or doc, and actually use it.

☐ I drafted a real task with AI · What it was: _____

ACTION 2 Run the de-identification drill ~5 min

Think of a real student situation you'd want AI help with. On paper, not in the tool, write the prompt twice: first the unsafe way you'd naturally say it, then the safe version using the 3 moves (strip identity · generalize · describe the need, not the child). This one rep makes the habit automatic.

☐ I rewrote one real prompt safely, and the safe version lost nothing that mattered

ACTION 3 Share one discovery ~2 min

Tell one colleague, in person or in the staff chat, one specific thing: a prompt that worked, a time-saver, or a failure worth knowing about ("it invented a source — check everything"). Commitment #3 starts with you.

☐ I shared one discovery · With: _____

WHILE YOU PRACTICE, THE RULE RIDES ALONG

Never put student personally identifiable information into a public AI tool.
And a human reviews everything before it reaches a student or family.

Stuck for a task? Steal from the handout's starter prompts; the parent-email pattern (option A from the lab) works for every role in the building.
