

FLIP THROUGH BEFORE YOU DOWNLOAD

Kit 1 – AI Foundations & Safety

Three real pages, straight off the shipping files, plus everything the full download includes.

45-minute version: run one lab task (slides 21–23 only), take two debrief voices instead of four, and read the shaded "45-min cut" notes where they appear.

From the founders

→ This note is from Adam and Katelyn Spinozzi, the two certified teachers who wrote this kit. It's here to give you their perspective before you present. Sharing it is entirely your call: read parts aloud where they fit, retell them in your own words, or keep it to yourself as background. The session is complete either way.

We're Adam and Katelyn, and here is why we believe this session matters more than any other hour of PD your staff will sit through this year: AI is already in your building, in backpacks and back pockets, whether the adults are ready or not. The teachers who will thrive with it aren't the ones who avoid it or the ones who worship it. They're the ones who understand what it actually is, follow one hard privacy rule without exception, and use the time it returns for the parts of teaching only a human can do. Get that foundation right and everything that follows in this series works. Get it wrong and no tool will fix it.

The lessons we believe this hour will leave with your staff: what these tools actually are; so many aren't intimidated by them or fooled by them; the one hard privacy rule, followed without exception; the one rule every educator safe; the habit of verifying anything factual before it's trusted; and the conviction that over-reliance is the real risk. AI can help, but only after a person can first identify a problem, understand what tools are needed to solve it, and see where AI fits in that toolbox. If the person isn't thinking for them, the muscle never develops. AI drafts. The teacher decides.

Segment 1 · Welcome & why now (slides 1–4)

SLIDE 1 Title

0:00

→ Slide 1 is on screen as people arrive. Start on time, standing, deck behind you.

Welcome, everyone. Today we're doing something a little different: an hour on AI: what it actually is, what it's genuinely useful for in our jobs, and the one rule every one of us needs to follow to use it safely. By the end you'll have used an AI tool with your own hands, and you'll walk out with prompts you can use tomorrow morning.

SLIDE 2 What today is (and isn't)

0:01

MS. RIVERA'S SCREEN · SO FAR Meet her: our running example teacher. Same piles on her desk as yours.

Two promises before we start. First: this is not a sales pitch. Nobody here is going to tell you AI is magic, or that you must love it. Some of the most important people in this room are the skeptics, and today will give you better reasons for your skepticism, not fewer.

Second: this is not a scare session. You may have heard AI will replace teachers. Here's our position, and it's the position of the two classroom teachers who built this training: AI is a tool. It can take over some of the robotic parts of this job: the reformatting, the first drafts, the paperwork. It cannot do the human parts: knowing your kids, building relationships, deciding what good work looks like. Today is about using the tool without ever handing it the parts of the job that make it teaching.

KEEP THIS ONE; IT'S BUILT TO LIVE ON YOUR DESK

AI Foundations & Safety: The One Hard Rule

THE ONE HARD RULE

Never put student personally identifiable information into a public AI tool. **Not a name. Not a detail. Ever.**

What an AI chatbot actually is

ChatGPT, Claude, Gemini, and Copilot don't look up facts; they **predict likely next words**, learned from enormous amounts of text. That's why the writing is fluent, and why it can be smoothly, confidently wrong. In one peer-reviewed test, nearly 20% of the citations an AI produced were entirely invented, and they looked perfect.

The intern is great at

- First drafts: newsletters, routine emails
- Leveling a text you already like (3rd grade texts)
- Rubrics, word banks, flash cards from your notes
- Reformatting: quiz → table → station cards

The intern cannot

- Know your students, or care about them
- Verify its own facts (that's you)
- Be trusted unreviewed with parents or kids
- Make the judgment calls; those stay yours

SNEAK PEEK · the full kit is 9 files

The posture in five words: AI drafts, the teacher decides. Nothing AI-made reaches a student or family without a human reading it first.

What counts as student PII

The obvious

- Names, initials, photos
- Student ID numbers
- Grades & test scores tied to a student
- Addresses, family details

The sneaky

- Initials + context ("J.M., 3rd period, anxiety dx")
- One-of-a-kind details (the only new student from Ukraine)
- IEP / 504 contents & accommodations
- Discipline or health specifics

The test: could anyone who knows our school figure out who this is? If yes, it doesn't go in the box. (Deleting the chat later doesn't undo what the company received.)

FOR THE FACILITATOR & LEADERSHIP TEAM · THE PART A SCHOOL SHOWS ITS BOARD

30-Day Implementation & Follow-Up Plan

One session changes an afternoon; the month after changes practice. The research on effective PD is consistent: active use, collaboration, and sustained duration are what make training stick. This plan needs about 30 minutes of PLC/staff-meeting time across four weeks, with no new meetings.

Week by week

Week	What happens	Owner
Week 1	Everyone completes the First 48 Hours sheet (3 actions, ~25 min total). Facilitator skims exit tickets, shares the three most common "worries" with leadership, and posts one staff-discovered prompt in the staff room or on the board.	All staff · Facilitator
Week 2	PLC follow-up #1, " Prompt Autopsy " (10 min, below). Leadership states, in writing, the school's interim stance on AI (see commitments from the session stand until a formal policy is written).	PLC leads · Admin
Week 3	PLC follow-up #2, " Safe or Not? " (10 min, below). Facilitator collects one time-saved story from each team; these become your board/community talking points.	PLC leads
Week 4	PLC follow-up #3, " One Hour Back " (10 min, below). Leadership reviews the month: participation, worries resolved and open, stories collected. Decide the date for Kit 2, Prompting Basics.	PLC leads · Admin

The quiet goal of the month: every staff member has used AI for at least one real task, safely, and nobody is pretending: the skeptics have been heard, the enthusiasts have guardrails, and the school has a written interim stance.

The three 10-minute PLC follow-ups

Ready to run as written. Any team member can lead them; no prep beyond reading the box.

WHAT'S INSIDE THE FULL KIT

Kit 1 – AI Foundations & Safety

- ✓ Facilitator prep guide — a 15-minute read
- ✓ Word-for-word facilitator script
- ✓ **34-slide editable PowerPoint** with speaker notes on every slide
- ✓ Participant handout
- ✓ First-48-hours action sheet
- ✓ 30-day implementation plan with PLC follow-ups
- ✓ Exit ticket that doubles as PD documentation
- ✓ Admin one-pager
- ✓ Full APA references, every statistic verified

Running it with your whole staff? Additional teacher licenses are just \$10, and we accept purchase orders through TpT for Schools.
