# SHORT I

pig • pin • six • lip • kid • bin

One consonant, one short vowel, one consonant.

1 • short a

2 • short i

3 • short o

4 • short u

5 • short e

pig

pin

six

lip

kid

bin

## This unit at a glance

Six practice pages, a ten-word probe on its own page, and a four-week data sheet. Work the unit until the probe shows 8 of 10 words. Then move to the next tab. The Growth Eval at the back of the binder works for every unit.

**SNEAK PEEK • the full binder is 52 pages**

## If a student is stuck

**Can't say the three sounds in a word**

Do the **sound-box page** on its own for a few days. It is the most basic task in the unit even though it sits third — segmenting comes before writing.

**Reads it with the picture, not without**

The picture is doing the decoding. Cover the pictures on the first practice page and read the words again before moving on.

**Accurate but slow, sound by sound**

The sound is secure; blending speed is the gap. Re-read the same page daily for a week rather than adding new words.

Every word in this unit uses the short i sound and nothing else — no other vowel leaks in — so a miss here means this sound, not a mix-up with the last tab.

to move on

# AI GROWTH EVAL • one STUDENT

Find the score from the data sheet. Read across. No technology needed for any of this.

**0-4**

**The sound is not secure yet.**

- Drop back to letter-sound work with just **a** — three minutes daily.
- Use the sound-box page before the writing pages.
- Re-probe in one week with the same ten words.

**5-7**

**Blending is emerging but not automatic.**

- Stay in the unit; keep the Build-It step rather than jumping to writing.
- Compare Practice 1 and Practice 2 — if only the no-picture page slipped, the pictures were decoding for them.
- Re-probe in one week; move at 8 twice in a row.

**8-10**

**Short a is solid. Move.**

- Start Unit 2 (short i): keep short a alive in the word box.
- Spot-check short a again in the word box.

**SNEAK PEEK • the full binder is 52 pages**

## OPTIONAL • USE AN AI ASSISTANT

*"I teach 2nd grade. A student scored 6 out of 10 on a short-vowel CVC probe. The misses were all words ending in -g and -m, and they self-corrected twice. Give me three specific next steps for this week and one way to check whether it worked."*

Describe the grade and the pattern — never a name, never a class list. The student never uses the tool.

Honest limits: ten words is a signal, not a diagnosis. Use it to choose this week's move, alongside everything else you know about the reader.

## WHAT'S INSIDE THE BINDER

# Short-Vowel CVC Intervention Binder

- ✓ **All five short vowels** — a, i, o, u, e — six practice pages each, 30 in total
- ✓ **Six probes with data sheets:** one per unit plus a mixed review of all five vowels
- ✓ **AI Growth Eval** — score bands to next steps, with a de-identified prompt option
- ✓ **Group snapshot** — sort a whole small group into re-teach / practise / move on
- ✓ The scope and sequence printed inside, and the research it is built on cited

Running it with your whole staff? Additional teacher licenses are just \$8, and we accept purchase orders through TpT for Schools.
