Our citation promise: every source in this kit was verified against the live publication — existence and claim — before inclusion. If AI research moves (it does, monthly), membership updates to this kit replace stale numbers rather than leaving them to age. If you find a link that has moved, tell us and we'll ship the fix to every member school.

How this kit was made

Every AI-Ready School kit is drafted with AI assistance — the same way we teach educators to use it — then researched, fact-checked, revised, and approved by Adam and Katelyn Spinozzi, certified educators with 20+ combined years in classrooms. Nothing ships without a teacher's judgment on it.
