

FLIP THROUGH BEFORE YOU DOWNLOAD

IEP Goal Tracking & Data Collection Sheets

Three real pages, straight off the shipping files, plus everything the full download includes.

Goal-at-a-glance

Fill in once per goal, clip to the front of that goal's data. Use a student number, never a name, on any page you photocopy for a coach, a substitute case manager, or a district file.

STUDENT NUMBER	GRADE	GOAL AREA	GOAL START DATE
GOAL TEXT (COPY FROM THE IEP)			
BASELINE	TARGET	CRITERION (E.G. "4 OF 5 TRIALS, 2 CONSECUTIVE SESSIONS")	
HOW THIS WILL BE MEASURED	HOW OFTEN DATA IS COLLECTED		REVIEW DATE

SNEAK PEEK · the full pack is 8 pages

Graph page

Draw your target line first — a straight line across the row that matches the goal's criterion percentage. Then plot each week's percentage as a dot and connect the dots as you go.

The dashed line prints at 70% as a starting guide — cross it out and add your own goal's criterion if that number is different.

Is this goal on pace? Technology check

No chart, no graph? Just read the last three data points against the target and match your situation below.

What you're seeing	What it usually means	A reasonable next step
Last three scores are flat or falling, well below target	The current approach may not be reaching this student	Bring the data to the team; consider a different teaching strategy or more frequent practice
Scores are rising, but slowly	Likely on pace, just early	Keep the current plan; re-check in two more weeks
Scores are rising quickly, near or at criterion	The goal may be close to met	Confirm with one more data point at criterion, then flag for the team to consider next steps
Scores bounce up and down with no clear direction	The measurement or the conditions may be inconsistent	Check that trials are given the same way each time before changing the goal itself

The AI Progress Summary page

This is the page nothing else in this niche has: turn six weeks of de-identified scores into a trend read and a drafted progress-report sentence. Use a student number only. Never paste a name, a class roster, or a diagnosis.

Below pace

On pace, early

Meeting or near criterion

Worked example — Student #14, two-digit addition with regrouping, criterion 8/10 correct on 2 consecutive weekly checks. Six weekly scores, out of 10: 4, 5, 5, 6, 7, 8.

Trend: steady increase, +4 points over six weeks, no week scored lower than the one before it.

Read against the criterion: this week's score of 8/10 meets the criterion for the first time. One more consecutive check at 8/10 or higher would meet the full two-check criterion.

What this is not: not a claim that the goal is met, and not a recommendation about whether to write a new goal — both stay the team's call once the second check comes in.

Copy-paste prompt: trend read + a drafted sentence

"Here are a student's weekly progress-monitoring scores, measured as a percent of a possible total: [PASTE SCORES ONLY — NO NAME, NO CLASS ROSTER, NO GOAL STATEMENT, NO GOAL LABEL]. The goal's criterion is: [PASTE THE CRITERION FROM THE GOAL-AT-A-GLANCE]. In three sentences: describe the trend, say whether the scores are moving toward the criterion, and draft one plain-language sentence a case manager could use in a progress report. Do not say whether the goal has been met — only describe the data."

SNEAK PEEK · the full pack is 8 pages

The chatbot drafts a sentence from numbers. Whether the goal is met, whether it changes, and what happens next stay the IEP team's decisions — every time, for every student.

WHAT'S INSIDE THE FULL PACK

IEP Goal Tracking & Data Collection Sheets

- ✓ A goal-at-a-glance page, weekly and six-week data sheets, and a daily tally sheet
- ✓ A hand-plotted graph page with a target line you draw in yourself
- ✓ **The AI Progress Summary page** — a drafted progress-report sentence from de-identified scores
- ✓ A caseload group snapshot and a meeting-prep one-pager, by student number

Running it with your whole staff? Additional teacher licenses are just \$4, and we accept purchase orders through TpT for Schools.
