

FLIP THROUGH BEFORE YOU DOWNLOAD

Short-Vowel CVC Intervention Binder

Three real pages, straight off the shipping files,
plus everything the full download includes.

READ IT. BUILD IT. WRITE IT.

Say the word out loud. Push a letter into each box. Then write it on the line.

bin

This unit at a glance

Six practice pages, a ten-word probe on its own page, and a four-week data sheet. Work the unit until the probe shows 8 of 10 words. Then move to the next tab. The Growth Eval at the back of the binder works for every unit.

SNEAK PEEK - the full binder is 52 pages

If a student is stuck

Can't say the three sounds in a word

Do the **sound-box page** on its own for a few days. It is the most basic task in the unit even though it sits third — segmenting comes before writing.

Reads it with the picture, not without

The picture is doing the decoding. Cover the pictures on the first practice page and read the words again before moving on.

Accurate but slow, sound by sound

The sound is secure; blending speed is the gap. Re-read the same page daily for a week rather than adding new words.

Every word in this unit uses the short i sound and nothing else — no other vowel leaks in — so a miss here means this sound, not a mix-up with the last tab.

8/10

to move on

AI GROWTH EVAL • one STUDENT

Find the score from the data sheet. Read across. No technology needed for any of this.

0-4

The sound is not secure yet.

- Drop back to letter-sound work with just **a** — three minutes daily.
- Use the sound-box page before the writing pages.
- Re-probe in one week with the same ten words.

5-7

Blending is emerging but not automatic.

- Stay in the unit; keep the Build-It step rather than jumping to writing.
- Compare Practice 1 and Practice 2 — if only the no-picture page slipped, the pictures were decoding for them.
- Re-probe in one week; move at 8 twice in a row.

8-10

Short a is solid. Move.

- Start Unit 2 (short i): keep short a alive with a new word.
- Spot-check short a again.

SNEAK PEEK • the full binder is 52 pages

OPTIONAL: USE AN AI ASSISTANT

"I teach 2nd grade. A student scored 6 out of 10 on a short-vowel CVC probe. The misses were all words ending in -g and -m, and they self-corrected twice. Give me three specific next steps for this week and one way to check whether it worked."

Describe the grade and the pattern — never a name, never a class list. The student never uses the tool.

Honest limits: ten words is a signal, not a diagnosis. Use it to choose this week's move, alongside everything else you know about the reader.

WHAT IS INSIDE THE BINDER

Short-Vowel CVC Intervention Binder

- ✓ **All five short vowels** — a, i, o, u and e — with six practice pages for each one, thirty pages in total
- ✓ **Six progress checks, each with its own data sheet:** one for every vowel, plus a mixed review that covers all five together
- ✓ **The AI Growth Eval** — a student scores 6 out of 10 and the page tells you what that score means and the next three things to do
- ✓ **The group snapshot** — write down a small group's scores and sort them into re-teach, practice, or move on
- ✓ **The teaching order is printed inside**, along with the research it is built on

Running it with your whole staff? Additional teacher licenses are just \$8, and we accept purchase orders through TpT for Schools.
