

PRINT ONCE A WEEK, TRACK ALL FIVE DAYS

Free Behavior Tracker

A daily point sheet, a frequency tally for one specific behavior, and a weekly summary that turns five days of marks into one honest read — no login, no app, no student data anywhere but the paper in your hand.

Daily point sheet

Rate each part of the day on the 1–4 scale below.

1 · needed a lot of support

2 · getting there

3 · good day

4 · great day

Day	Morning	Midday	Afternoon	Total	Note
Mon					
Tue					
Wed					
Thu					
Fri					

Rate the whole period, not the worst moment in it — one rough five minutes in an otherwise solid morning is still a 3, not a 1.

Frequency tally

Pick one specific behavior to count this week (out of seat, calling out, a kind word to a peer). Make one tally mark each time it happens.

BEHAVIOR COUNTED THIS WEEK

Day	Tally	Total
Mon		
Tue		
Wed		
Thu		
Fri		

Weekly summary & what it means

Add up the week, then match your total against the bands below for a fast read — no chart, no login required.

Needs a plan (below 30)

Watching it (30–44)

Solid week (45–60)

WEEK'S POINT TOTAL (OUT OF 60)

WEEK'S TALLY TOTAL

A total below 30 is worth bringing to a colleague, a coach, or a family conversation this week rather than waiting it out. Thresholds are a starting guide — trust your own read of the student over any number on this page.

If it's a low week

- **Look for a pattern before you look for a plan** — same period each day, same subject, same seat neighbor. The tally column often shows it before the point total does.
- **Bring the paper, not just the memory**, to whoever you loop in — a colleague, a coach, or the family. Numbers travel better than "it's been a rough week."
- **Keep rating the good days too.** A tracker that only comes out for bad weeks stops being data and starts being a warning label.

Copy-paste prompt: this week in one sentence

"A student's daily behavior points this week, out of 4 each period: [PASTE THE FIFTEEN NUMBERS ONLY — NO NAME]. Describe the trend across the week in one sentence, plain language, no diagnosis or judgment implied."

Tracking an IEP goal instead of a weekly behavior check? Our IEP Goal Tracking & Data Collection Sheets pack builds the weekly data, the graph, and an AI progress summary for that. Our IEP at a Glance pack builds the one-page student summary every gen-ed teacher and para keeps at hand. Both in our TpT store.
