

PRINT ONCE PER GOAL, REUSE ALL YEAR

IEP Goal Tracking & Data Collection Sheets

Everything a case manager needs to collect, graph, and report progress-monitoring data for one IEP goal — and the one page nothing else in this space offers: an AI page that turns six weeks of scores into a drafted progress-report sentence, using student numbers only, never a name.

- **Goal-at-a-glance page** — the goal text, baseline, target, and the exact criterion for meeting it, all in one place.
- **Weekly data sheet** — twelve weeks of trials and percentage columns.
- **A six-week short-cycle sheet** — for a goal nearing mastery or a shorter review window.
- **Daily quick-tally sheet** — for goals measured every session instead of weekly.
- **Prompting-level recording sheet** — records which level of prompt a response needed, cited to the standard hierarchy used in special education.
- **Hand-plotted graph page** with a target line you draw in yourself.
- **"Is this goal on pace?" decision table** — the zero-technology check.
- **The AI Progress Summary page** — the differentiator.
- **Caseload group snapshot** — every goal at a glance, by student number.
- **Meeting-prep one-pager** — what the data says, in plain sentences.

BEFORE YOU USE ANY PAGE IN THIS PACK**This is a tracking tool, never a decision-maker.**

It never states what a goal should say, whether a student qualifies for services, or what placement is appropriate — those stay IEP-team decisions, every time.

Goal-at-a-glance

Fill in once per goal, clip to the front of that goal's data. Use a student number, never a name, on any page you photocopy for a coach, a substitute case manager, or a district file.

STUDENT NUMBER	GRADE	GOAL AREA	GOAL START DATE
_____	_____	_____	_____
GOAL TEXT (COPY FROM THE IEP)			

BASELINE	TARGET	CRITERION (E.G. "4 OF 5 TRIALS, 2 CONSECUTIVE SESSIONS")	
_____	_____	_____	
HOW THIS WILL BE MEASURED	HOW OFTEN DATA IS COLLECTED	REVIEW DATE	
_____	_____	_____	

Weekly data sheet — 12 weeks

One row per week. Record the number of trials given, the number correct, and the percentage — then carry the percentage to the graph page.

Week of	Trials given	Correct	Percent	Notes
1				
2				
3				
4				
5				
6				
7				
8				
9				
10				
11				
12				

Six-week short-cycle sheet

Use this shorter version for a goal close to mastery, a shorter review cycle, or a mid-quarter check on a new goal.

Week of	Trials given	Correct	Percent	Notes
1				
2				
3				
4				
5				
6				

Same columns, half the rows — print this one when twelve weeks would sit mostly blank.

Daily quick-tally sheet

For a goal measured every session instead of every week — mark one tally box per opportunity, circle a total at the end of the day.

Date	Tally (one box per opportunity)	Total	Percent

Prompting-level recording sheet

Records which level of prompt a response needed — it does not tell you which level to use with a student. This sheet follows the response-prompting hierarchy used across special education and applied behavior analysis, described in Alberto, P. A., & Troutman, A. C., *Applied Behavior Analysis for Teachers* (Pearson): from most help to least, full physical · partial physical · model · gestural · verbal · independent.

Trial	Independent	Verbal	Gestural	Model	Partial physical	Full physical
1						
2						
3						
4						
5						
6						
7						
8						

Mark a check in the column that matches the help the student needed for that trial. Which level to use in teaching stays the practitioner's and the IEP team's call — this page only records what happened.

Graph page

Draw your target line first — a straight line across the row that matches the goal's criterion percentage. Then plot each week's percentage as a dot and connect the dots as you go.

The dashed line prints at 70% as a starting guide — cross it out and redraw it at your own goal's criterion if that number is different.

Is this goal on pace? The zero-technology check

No chart, no AI, no login — just read the last three data points against the target and match your situation below.

What you're seeing	What it usually means	A reasonable next step
Last three scores are flat or falling, well below target	The current approach may not be reaching this student	Bring the data to the team; consider a different teaching strategy or more frequent practice
Scores are rising, but slowly	Likely on pace, just early	Keep the current plan; re-check in two more weeks
Scores are rising quickly, near or at criterion	The goal may be close to met	Confirm with one more data point at criterion, then flag for the team to consider next steps
Scores bounce up and down with no clear direction	The measurement or the conditions may be inconsistent	Check that trials are given the same way each time before changing the goal itself

The AI Progress Summary page

This is the page nothing else in this niche has: turn six weeks of de-identified scores into a trend read and a drafted progress-report sentence. Use a student number only. Never paste a name, a class roster, or a diagnosis.

Below pace

On pace, early

Meeting or near criterion

Worked example — Student #14, two-digit addition with regrouping, criterion 8/10 correct on 2 consecutive weekly checks. Six weekly scores, out of 10: 4, 5, 5, 6, 7, 8.

Trend: steady increase, +4 points over six weeks, no week scored lower than the one before it.

Read against the criterion: this week's score of 8/10 meets the criterion for the first time. One more consecutive check at 8/10 or higher would meet the full two-check criterion.

What this is not: not a claim that the goal is met, and not a recommendation about whether to write a new goal — both stay the team's call once the second check comes in.

Copy-paste prompt: trend read + a drafted sentence

"Here are a student's weekly progress-monitoring scores, most recent last, out of a possible total: [PASTE SCORES ONLY — NO NAME, NO CLASS ROSTER, NO DISABILITY LABEL]. The goal's criterion is: [PASTE THE CRITERION FROM THE GOAL-AT-A-GLANCE PAGE]. In three sentences: describe the trend, say whether the scores are moving toward that criterion, and draft one plain-language sentence a case manager could use in a progress report. Do not state whether the goal has been met — only describe the data."

The chatbot drafts a sentence from numbers. Whether the goal is met, whether it changes, and what happens next stay the IEP team's decisions — every time, for every student.

Caseload group snapshot

One row per student on your caseload, by number, for a fast read of who needs attention this week.

Student #	Goal area	Last score	3-week trend	On pace?	Flag for team

Update this page weekly and you can answer "how is my caseload doing?" in the hallway without opening a single folder.

Meeting-prep one-pager

Fill this in the night before an IEP meeting so the data walks in the room already turned into sentences.

STUDENT NUMBER

MEETING DATE

IN ONE SENTENCE, WHAT DOES THE DATA SHOW?

IS THE CURRENT GOAL ON PACE, AND HOW DO YOU KNOW?

ONE THING THAT'S WORKING AND IS WORTH CONTINUING

QUESTIONS YOU WANT THE TEAM TO DISCUSS

Filing this pack

- **One folder per goal, not per student**, if a student has more than one goal you track closely — it keeps the graph and the data sheet for that goal together.
- **Start a fresh weekly data sheet the moment one fills up** rather than squeezing extra weeks into the margin.
- **File by student number** in a locked cabinet or a password-protected folder, matching your district's storage policy for special education records.
- **Shred or securely delete** a goal's working sheets once the official progress report is filed, per your district's retention schedule.

De-identification, always

BEFORE ANY PAGE IN THIS PACK GOES INTO A CHATBOT
Student number, grade, goal area, and scores only.
Never a name, never a full roster, never a diagnosis or disability label.

This applies to every prompt in this pack, including the AI Progress Summary page. If a sentence you're about to paste would let a stranger identify the student, take out the detail that does it before you paste.

What this pack is not

- **Not an IEP.** It tracks progress toward a goal the team already wrote.
- **Not a compliance document.** Follow your district's official progress-reporting process and forms; use these pages as your own working data, not the official record unless your district says otherwise.
- **Not legal or clinical advice.** It never states whether a student qualifies for services, what a goal should say, or what placement is appropriate.

Want the fast front door to this family? Our IEP at a Glance pack builds the one-page student summary every gen-ed teacher and para keeps at hand. In our TpT store.
