

FOR PRINCIPALS & SUPERINTENDENTS · 3-MINUTE READ

AI & Academic Integrity: Ask for One Thing AI Can't Hand In

A 45–60 minute session in which every teacher rebuilds one real upcoming assignment so a chatbot cannot complete it. Run by your own coach; no consultant required.

THE STANCE, AND YOUR PARENT ANSWER

Assignments ask for something only this classroom could produce, every assignment says where AI stands in one line, and **no student is ever accused based on an AI-detector score alone.**

Why this matters now

54% of teens use AI for schoolwork (Pew, 2026) while guidance lags adoption (RAND, 2025). Detection does not close that gap: OpenAI withdrew its own classifier citing "its low rate of accuracy" (26% of AI text caught, 9% of human writing falsely flagged), and seven commercial detectors falsely flagged real TOEFL essays by non-native English writers at an average of 61.3% while classifying US eighth-grade essays near-perfectly (Liang et al., 2023). That is an equity and liability exposure, not a solution. Meanwhile self-reported cheating stayed relatively stable at roughly 60–70% before and after ChatGPT across the three high schools Stanford researchers surveyed (Lee, Pope et al., 2024). Three schools and self-report, not national causal proof, but enough to treat this as a design problem.

What your staff walks out with

- One real assignment, rebuilt and ready to hand out this week
- One sentence in it a chatbot is structurally unable to produce
- A curiosity-first conversation for suspected misuse, built on process evidence
- The red line, stated cold: no accusation on a detector score alone, ever

Research base in brief

OpenAI (2023) on its withdrawn classifier · Liang et al., *Patterns* (2023) on detector bias · Lee, Pope, Miles & Zárate (2024) on cheating prevalence at three high schools · Stanford GSE / Pope (2023) on why students cheat · Pew (2026) and RAND RR-A4180-1 (2025) on use and guidance · Perkins, Furze, Roe & MacVaugh (2024), the AI Assessment Scale, credited as prior art. Full APA citations ship in the References file.

Where it fits

Kit 5 of 8 in **Track A: AI Foundations**, the student-facing counterpart to Kit 4's assessment work. Ships with a 30-day plan and an exit ticket that doubles as PD documentation. Kit 6 is next.
