

FOR THE FACILITATOR & LEADERSHIP TEAM · THE PART A SCHOOL SHOWS ITS BOARD

30-Day Implementation & Follow-Up Plan

The session sent real messages; the month makes reviewed, personal, accessible communication the school's default. About 30 minutes of existing PLC/staff-meeting time across four weeks, no new meetings.

Week by week

Week	What happens	Owner
Week 1	Everyone completes the First 48 Hours sheet: lab message sent, three positive notes personalized and sent, roster languages learned. Facilitator reads exit tickets and collects recurring "still want help with" situations for follow-up #2.	All staff · Facilitator
Week 2	PLC follow-up #1, "Batch Check" (10 min, below): did the second week's notes go out, and what came back from families?	PLC leads
Week 3	PLC follow-up #2, "The Translation Audit" (10 min, below): every team knows its rosters' languages, channels, and human-check names.	PLC leads
Week 4	PLC follow-up #3, "Template Harvest" (10 min, below). Leadership reviews the month: notes flowing weekly, no unreviewed sends, access plans real. Schedule Kit 7, AI for Workload.	PLC leads · Admin

THE LINE LEADERSHIP HOLDS ALL MONTH

Families hear the teacher, not the tool: everything reviewed and personalized, hard news by voice, official documents through district translation. Any drift gets a private, kind correction the week it appears.

The three 10-minute PLC follow-ups

Follow-up #1 · "Batch Check"

Week 2 · 10 min

Round (6 min): each person reports: did your three notes go out, and what happened? Read one reply from a family if you got one (no names). The stories are the fuel; expect at least one that quiets the room.

Fix (3 min): anyone whose batch stalled names the blocker (usually "forgot" or "felt awkward"); the team picks a shared batch day so the habit has a home.

Close (1 min): confirm next week's batch day. This habit is the single highest-leverage thing the kit installed.

Follow-up #2 · "The Translation Audit"

Week 3 · 10 min

Audit (6 min): each teacher answers three questions from their access plan: which languages do your families read? Where do official documents go? Who is your human check? Gaps get written down, not judged.

Route (3 min): gaps that teachers can't close alone (no liaison, no district channel, unknown languages) get routed to leadership by name; language access is an obligation, and closing it is the school's job, not each teacher's improvisation.

Close (1 min): each teacher names the one family who'll start receiving readable messages this week.

Follow-up #3 · "Template Harvest"

Week 4 · 10 min

Harvest (6 min): each person posts their best message of the month to the staff doc's Communication section: newsletter shell, difficult-email frame, event reminder, note starters. Name and one line on when to use it.

Steal (3 min): everyone takes one template they didn't write and schedules its first use. Nobody writes the field-trip reminder from scratch again.

Close (1 min): confirm the Kit 7 date; bring your calendar, because Kit 7 audits your week.

Leadership checklist for the month

- ☐ **Week 1:** ask three teachers what they sent, not whether they liked the PD; sends are the measure
- ☐ **Week 2:** be ready with the parent answer, word for word: "Teachers may use AI to draft routine messages, and every message is reviewed and personalized by the teacher before it's sent. Sensitive news is always delivered personally."
- ☐ **Week 3:** close the access gaps the audit routes up; language access is a Title VI obligation and a leadership deliverable
- ☐ **Week 4:** collect one story for the board: a family reply to a positive note, or the first family reached in their own language; specifics beat adjectives

What "working" looks like at day 30

Signal	How you'll know
Notes flow weekly	Batch day exists; families reply; teachers tell the stories unprompted
Voice survived	Newsletters sound like their teachers, not like each other
Access is real	Every team knows its languages, channels, and human checks; first families reached
The lines hold	No unreviewed sends; hard news travels by voice; official documents travel district channels

If the month goes sideways

Symptom	Fix
A message goes out that reads machine-made	Private, kind correction; re-teach the voice pass. One beige blast erodes more trust than ten good notes build.
Someone drafts sensitive news with AI	Coach privately the week you learn of it: the human-only list is the non-negotiable of this kit. Re-anchor at the next meeting without naming names.
Note batches die by week 3	The blocker is almost always no scheduled day. Pick a shared batch day; five minutes, calendared, survives October.
Translation stalls on "we have no liaison"	That's a leadership gap, not a teacher task. Escalate it as the compliance item it is; interim: plain-language messages + AI translation + the best human check available.
