

THREE SENDS · EACH UNDER 15 MINUTES · WITHIN TWO DAYS

Three sends, and families feel this PD

PD that isn't used within two days mostly evaporates. Each action below sends something you built in the lab. Do all three, check the boxes, done.

SEND 1 The message you drafted ~5 min

Your lab message passed the voice pass and the access pass; it's done. Give it one last read in your own email and send it on schedule. Done beats perfect, and this one is both.

☐ Sent · What it was: _____

SEND 2 Three positive notes ~10 min

Take your three starters, personalize each for a real student in your own words and your own email, and send them to three families. Improvement-focused and warm; one true sentence each. This is the habit the research validated.

☐ Three notes sent, each personalized · Week two batch scheduled for: _____

SEND 3 The access plan's first step ~10 min

Do line one of your plan: find out which languages your families read (your front office or student information system usually knows). Then send one routine message translated for one family who's been missing them, human-checked if stakes warrant.

☐ Languages known · First translated message sent: _____

THE STANCE, POCKET-SIZED
Families hear you, not the tool.

Review and personalize everything. Hard news travels by voice.

Stuck? All three prompts are on the handout, copy-ready. Start with Send 1; it's already written.
