

FOR THE FACILITATOR & LEADERSHIP TEAM · THE PART A SCHOOL SHOWS ITS BOARD

30-Day Implementation & Follow-Up Plan

One session changes an afternoon; the month after changes practice. The research on effective PD is consistent: active use, collaboration, and sustained duration are what make training stick. This plan needs about 30 minutes of PLC/staff-meeting time across four weeks, with no new meetings.

Week by week

Week	What happens	Owner
Week 1	Everyone completes the First 48 Hours sheet (3 actions, ~25 min total). Facilitator skims exit tickets, shares the three most common "worries" with leadership, and posts one staff-discovered prompt in the staff room or chat.	All staff · Facilitator
Week 2	PLC follow-up #1, " Prompt Autopsy " (10 min, below). Leadership states, in writing, the school's interim stance: the three commitments from the session stand until a formal policy exists.	PLC leads · Admin
Week 3	PLC follow-up #2, " Safe or Not? " (10 min, below). Facilitator collects one time-saved story from each team; these become your board/community talking points.	PLC leads
Week 4	PLC follow-up #3, " One Hour Back " (10 min, below). Leadership reviews the month: participation, worries resolved and open, stories collected. Decide the date for Kit 2, Prompting Basics.	PLC leads · Admin

The quiet goal of the month: every staff member has used AI for at least one real task, safely, and nobody is pretending: the skeptics have been heard, the enthusiasts have guardrails, and the school has a written interim stance.

The three 10-minute PLC follow-ups

Ready to run as written. Any team member can lead them; no prep beyond reading the box.

Follow-up #1 · "Prompt Autopsy"

Week 2 · 10 min

Setup (1 min): one volunteer shares a real prompt they tried since the session, plus the AI's response, on a screen or read aloud.

Autopsy (6 min): the team improves it together, one change at a time: What context was missing? What format should we have demanded? What would we push back with? Run the improved prompt live if a device is handy.

Close (3 min): each person writes down one technique they're stealing. The improved prompt goes in the shared staff prompt doc; that doc is the seed of your school's prompt library (Kit 18 grows it).

Follow-up #2 · "Safe or Not?"

Week 3 · 10 min

Warm-up (4 min): read these four aloud; thumbs up (safe) or down (unsafe) as a team:

1. "Draft a study guide for my unit on the water cycle." (*safe*)
2. "Here's my class roster with reading scores. Group them for me." (*unsafe: roster + scores*)
3. "Suggest de-escalation phrases for a student who gets frustrated during math." (*safe: no identity*)
4. "Summarize this IEP meeting note so I can email it to his caseworker." (*unsafe: record contents*)

The interesting part (5 min): each person writes one prompt from their own real work that lives near the line, and the team applies the test: *could anyone who knows our school figure out who this is?* Rewrite the unsafe ones with the 3 moves. Disagreements are the curriculum: surface them, don't settle them by vote; when genuinely unsure, leave it out of the tool.

Close (1 min): any prompt the team couldn't resolve goes to leadership; those edge cases are exactly what a school AI policy exists to answer (Kit 15).

Follow-up #3 · "One Hour Back"

Week 4 · 10 min

Round (6 min): each person, 30 seconds: the single best time-saver AI gave you this month, or the most useful failure you caught. Both count; the failure stories are how the team learns verification.

Harvest (3 min): the two best time-savers get written up in one sentence each and posted to the staff prompt doc. The facilitator collects one story for the board/community update.

Close (1 min): preview Kit 2, Prompting Basics, and confirm its date.

Leadership checklist for the month

- ☐ **Week 1:** read the exit-ticket "worry" themes, then respond to the top one in your next staff memo (heard beats perfect)
- ☐ **Week 2:** put the interim stance in writing: the session's three commitments, signed by the principal, one page
- ☐ **Week 3:** collect the time-saved stories; they're your answer when a board member or parent asks "what are we doing about AI?"
- ☐ **Week 4:** schedule Kit 2, and note who emerged as your building's natural AI leads; they're your future facilitators

What "working" looks like at day 30

Signal	How you'll know
Universal safe practice	Staff can state the One Hard Rule and the 3 de-identification moves unprompted
Real use, not compliance	The staff prompt doc has entries you didn't put there
Honest culture	At least one shared story is about AI being <i>wrong</i> , and being caught
Momentum	Kit 2 is on the calendar and nobody had to be convinced

If the month goes sideways

Symptom	Fix
Follow-ups keep getting bumped from PLC time	Shrink, don't skip: even 5 minutes of "Safe or Not?" keeps the habit alive. The sequence matters more than the minutes.
Only the enthusiasts are participating	Have a respected skeptic lead follow-up #3; the "useful failure" round belongs to them, and it reframes participation as scrutiny, not cheerleading.
Someone breaks the rule	Coach privately, not publicly; assume good intent; the sneaky-PII cases are genuinely non-obvious. Re-run "Safe or Not?" with the (anonymized, generalized) case as item 5.
Staff ask questions the team can't answer	Collect them verbatim; they're the agenda for Kit 15 (policy workshop) and evidence for the district that governance work is due.
