

FOR PRINCIPALS & SUPERINTENDENTS · 3-MINUTE READ

AI for Assessment: Rubrics, Feedback, and Question Banks

A 45–60 minute, self-facilitated session in which every teacher builds a rubric and a question bank for a real upcoming assessment, plus reusable feedback starters. Run by your own coach or teacher-leader; no consultant required.

THE STANCE, AND YOUR PARENT ANSWER

AI drafts assessment **materials**. It never grades students, never sees student work with names attached, and never makes decisions about students. Every grade and every comment comes from the teacher.

Why this matters now

Teachers work about 54 hours a week, with a median 5 hours on grading and feedback (Merrimack College/EdWeek, 2022), and feedback is among the most powerful influences on achievement measured, averaging a 0.79 effect size (Hattie & Timperley). Yet RAND found only about 15% or fewer of AI-using teachers used AI for writing assessments in 2023–24: the least-tapped, highest-leverage use of the tools. Among teachers who do use AI, 57% say it improves the quality of their grading and feedback (Gallup, 2025). This session closes that gap with the guardrails written down first.

What your staff will be able to do afterward

- Turn grading notes into 4-level rubrics in student-readable language, tested by the "hand it to a student" bar
- Build mixed-format question banks with answer keys and misconception-based distractors, then vet every question by hand
- Draft reusable feedback starters for common patterns, personalized before any student sees them
- State the red lines cold: AI never grades, never sees named work, never decides about a student
- Apply the anonymous-excerpt rule: zero identifying details, or describe the pattern instead
- Add assessment templates to the shared staff prompt library from Kit 2

Research base in brief

Workload: Merrimack College & EdWeek Research Center (2022) · Feedback power: Hattie & Timperley (2007) · Formative assessment: Black & Wiliam (1998) · Rubrics: Panadero et al. (2023) meta-analysis · AI question quality with vetting: Elkins et al. (2023) · AI vs. human feedback, honestly framed: Steiss et al. (2024); Kaliisa et al. (2025) meta-analysis · Adoption gap: RAND RR-A134-25 (2025) · Teacher-reported quality: Gallup–Walton Family Foundation (2025). Full APA citations ship in the kit's References file.

Where it fits

Kit 4 of 8 in **Track A: AI Foundations**, after Kits 1–2 set the privacy rules and prompt skills. Ships with a 30-day plan (three 10-minute PLC follow-ups, no new meetings) and an exit ticket that doubles as PD
