

FLIP THROUGH BEFORE YOU DOWNLOAD

Kit 2 – Prompting Basics

Three real pages from the kit, straight off the shipping files, plus everything the full download includes.

From the founders

→ This note is from Adam and Katelyn Spinozzi, the two certified teachers who wrote this kit. It's here to give you their perspective before you present. Sharing it is entirely your call: read parts aloud where they fit, retell them in your own words, or keep it to yourself as background. The session is complete either way.

We're Adam and Katelyn, and here is why this session matters for what happens in your classrooms: the gap between teachers who get real hours back from AI every week and teachers who quit on it in frustration is not talent or technology. It is one learnable skill, knowing how to ask. A teacher who can prompt well turns evenings of drafting into minutes, and spends the difference on students. A teacher who can't concludes the tool is a toy.

The lessons we believe this hour will leave with your staff: the four-part formula (role, task, context, format) that turns vague requests into reliable results; the discipline of iterating instead of settling for a first draft; the honest limit that no prompt, however good, retires your judgment or your duty to verify; and a line we hold personally, that your voice matters most in personal communication with parents and students. In those messages, your voice isn't a finishing touch; it's the substance. Let AI help with the routine and the structure. When the message is personal, the words should be yours.

Segment 1 · Welcome & the gap (slide 1)

SLIDE 1 Title

0:00

→ Slide 1 up as people arrive. Start on time.

Welcome back. Last session we agreed on the rules of the road: no student information in public AI tools, and a human reviews everything before it reaches a student or a family. Today is about the skill that turns AI from a curiosity into a colleague: writing prompts that get useful results every time, not just sometimes.

SLIDE 2 The gap

0:01

MS. RIVERA'S SCREEN · SO FAR Her gap: same tools as the weekly savers. The skill is what differs.

Here's the number that explains why this hour exists. In the big 2025 Gallup survey of teachers, about three in ten used AI weekly, and those weekly users saved nearly six hours a week. Meanwhile four in ten teachers didn't use AI at all. Same tools, same access. The difference between those two groups isn't the technology; it's a skill. And the skill is mostly one thing: knowing how to ask.

KEEP THIS ONE; IT'S BUILT TO LIVE ON YOUR DESK

Prompting Basics: Getting Useful Results Every Time

THE FORMULA

Role · Task · Context · Format**Then iterate: content, voice, details.**

The four parts

Part	The question it answers	Example
Role	Who should the AI be?	"You are an experienced 4th grade teacher."
Task	What exactly do you want? One clear verb.	"Draft a 45-minute history lesson on equivalent fractions."
Context	What would a good response look like?	"The class has mastered notation but confuses numerator and denominator when simplifying."
Format	What should the output look like?	"A table with timings; include a 3-question exit check."

SNEAK PEEK · the full kit is 9 files

The colleague test: before you hit enter, imagine showing the prompt to a colleague with zero context. If they'd be confused, the model will be too. (Straight from the AI companies' own documentation.)

The spice rack: four small upgrades

- **Constraints:** "under 150 words" · "exactly five questions" · "no materials that need a copier"
- **Audience:** "for students who have never seen this word" · "for families skimming on a phone"
- **An example:** paste one sample in the style you want and say "match this style"
- **Escape hatch:** "Ask me up to three clarifying questions before you start."

FOR THE FACILITATOR & LEADERSHIP TEAM · THE PART A SCHOOL SHOWS ITS BOARD

30-Day Implementation & Follow-Up Plan

The session built one reusable prompt per person; the month grows a library. About 30 minutes of existing PLC/staff-meeting time across four weeks, no new meetings.

Week by week

Week	What happens	Owner
Week 1	Everyone completes the First 48 Hours sheet. Facilitator checks the staff prompt doc, nudges stragglers with one friendly line, and reads the exit-ticket "task I still want help with" column.	All staff · Facilitator
Week 2	PLC follow-up #1, "Makeover Minute" (10 min, below): the team rebuilds a prompt from real work using the four parts.	PLC leads
Week 3	PLC follow-up #2, "Template Swap" (10 min, below): everyone runs a colleague's template on their own, reports back.	PLC leads
Week 4	PLC follow-up #3, "Library Audit" (10 min, below). Leadership reviews the month: prompt-doc entries, time-saved stories. Schedule Kit 3, Planning & Differentiation.	PLC leads · Admin

SNEAK PEEK · the full kit is 9 files

The quiet goal of the month: the staff prompt doc becomes a living tool with entries from most of the staff, at least one shared template per team, and a visible habit of iterating before settling.

The three 10-minute PLC follow-ups

Follow-up #1 · "Makeover Minute"

Week 2 · 10 min

Setup (2 min): one volunteer shares a prompt from their real work that underdelivered, on screen or read aloud.

Makeover (6 min): the team rebuilds it with the four parts, out loud: what's the role? the task verb? what context would a substitute need? what format? Run the before and after live if a device is handy; the delta sells itself.

Close (2 min): the improved version goes in the staff prompt doc, credited to the whole team.

WHAT'S INSIDE THE FULL KIT

Kit 2 – Prompting Basics

- ✓ Facilitator prep guide
- ✓ Word-for-word facilitator script
- ✓ **33-slide editable PowerPoint** with speaker notes on every slide
- ✓ Participant handout
- ✓ First-48-hours action sheet
- ✓ 30-day plan
- ✓ Exit ticket
- ✓ Admin one-pager
- ✓ Full APA references

Running it with your whole staff? Additional teacher licenses are a flat \$10, and we accept purchase orders through TpT for Schools.
